TypeScript (Expert)

Node.js / NestJS

Docker

Microservices

Architecture Design

n8n / Automations

PostgreSQL / MongoDB

Ruby & Rust

EXECUTIVE PROFILE

Tech Leader and Software Architect with over 5 years of experience scaling technical departments. I have led high-performance multidisciplinary teams (up to **24 engineers**), consolidating **Clean Code** standards and microservices architectures. Specialist in creating dynamic backend ecosystems and process automation to maximize operational efficiency and technology ROI.

MANAGEMENT & TECHNICAL EXPERIENCE

Engineering Manager / Lead Architect

2023 - 2025

Dazlabs (Software Factory)

- > **Team Management:** Led 24 people focused on technical mentorship (SOLID/Patterns) and development lifecycle optimization.
- > **Product Innovation:** Architected a 100% dynamic backend with NestJS, reducing server deployment needs by 60% for UI changes.
- > **Emerging Technologies:** Implementation of scalable solutions with Rust and Parse-Server for high-concurrency services.

Senior Backend Developer

2022 - 2023

Alexatech

Development of critical infrastructure for high-demand platforms (Terraza Club) and document management systems (ACHS) using Nest.js and PostgreSQL.

Systems Coordinator / IT Manager

2020 - 2021

CorpoLara

Administration of Linux servers and SIGESP databases. Technical reinforcement of staff and securing of critical operations by 50%.

SPECIALIZED TRAINING 2025

ARCHITECTURE & APIS

NestJS + Microservices & GraphQL
Specialization in Modern Scalability

PROCESS OPTIMIZATION
